

PERFORMANCE LUBRICATION

PRODUCT INFORMATION

CHAIN LUBE SPRAY

Motorcycle chain lubricant

DESCRIPTION

Chain lube is a lubricant specially formulated for all types of chains, including chains with seals, protecting them in the most severe conditions. Its special additives provide a much higher film resistance than any conventional chain lubricant and it is also characterised by its great anti-wear properties.

PERFORMANCE

Chain lube is a highly penetrating lubricant, specially formulated for motorcycle chains with or without seals. Highly resistant to centrifugal forces, water and high temperatures.

- It is applied concentrated, and quickly penetrates between the links and rollers of the chains where lubrication is essential.
- It incorporates a viscous anti-wear oil that reduces friction by sticking to the chain.
- It is completely waterproof and provides maximum lubrication and rust protection.
- It is long lasting, repels water and does not retain dirt.
- It is not flammable.
- It does not come off due to the effect of centrifugation.

CONDITIONS OF USE

- Clean the chain with GRO Chain cleaner.
- Shake before use.
- Apply along the inside of the chain.
- It adheres to the chain after a few minutes of drying.
- To extend the life of the chain, it is recommended to repeat the operation every 1,000 km.

TECHNICAL FEATURES

VISCOSITY AT 100°C: 65 mm²/s
FREEZING POINT: -4°C / 24.8 F

Rev. 11/23
