

PERFORMANCE LUBRICATION

PRODUCT INFORMATION

FILTER CLEANER

Powerful cleaner for air filters

DESCRIPTION

Filter cleaner is an air filter cleaner specially formulated for all types of foam air filters, of low aggressiveness for foam and filter rubbers. It removes oil, mud and soil residues, improving filtration without damaging the filter's porous layer. Once clean and dry, the use of Foam Filter Oil is recommended for greasing.

PERFORMANCE

It cleans all types of foam air filters.

It effectively removes fatty substances (oil, rubber...), dust, mud, sand for better filtration.

Contrary to petrol, Filter cleaner does not deform or harden the filter.

It dries quickly.

CONDITIONS OF USE

- Pour Filter cleaner into a clean container.
- Bathe and squeeze the filter to remove impurities.
- Slowly drain the filter.
- Leave to dry.
- Re-impregnate the filter with Foam Filter Oil.
- Fit the filter.
