

PERFORMANCE LUBRICATION

PRODUCT INFORMATION

FOAM FILTER OIL SPRAY

Lubricant for air filters

DESCRIPTION

It provides superior filtration characteristics to ensure full engine performance while protecting internal components from contamination, both in old and new filter elements.

PERFORMANCE

Foam filter oil spray protects filters from water, preventing moisture and blockages, giving longer filter life and an effective seal. Its superior qualities retain dust from the air, sand and dirt. Its dark blue colour makes it easy to see whether the filter element is in a good state of maintenance.

It presents the following properties:

- Specially designed to protect from dust, grit and dirt.
- It protects filters against water.
- The oil adheres perfectly to the filter, avoiding dripping.
- Consistent protection.
- Easy to apply.

CONDITIONS OF USE

- Clean the filter with GRO Filter cleaner.
- Spray from a distance of about 15 cm to facilitate diffusion.
- Wait 10 minutes before fitting the filter.
- To improve the air filtration, it is advisable to grease the filter lips and the inside of the air box with Global complex LT-2.
